Professional Summary

Data Analyst (B.Sc. Computer Science Honours, University of Delhi, 2026) who engineered a full ETL pipeline for 190K+ records and shipped three production-style Power BI dashboards. Experienced in cleaning and consolidating messy, multi-source business data into stakeholder-ready dashboards.

Technical Skills

Languages: Python (Pandas, NumPy, Scikit-learn), SQL (Joins, Subqueries, Group By), C++ (Basics)

Visualization: Power BI (DAX, Power Query, Forecasting), Tableau, Excel (Pivot Tables, VLOOKUP, Solver)

Data Engineering: Microsoft Fabric (Lakehouse, Delta Tables, Warehouse), ETL, MySQL, Git

Experience

Data Analyst Intern

June 2026 – August 2026

Apna Shop (Kirana / Retail Store)

New Delhi, India

- Consolidated 12 months of sales data (5,000+ records) from inconsistent sources – desktop records, WhatsApp order logs, and manual entries – into a single structured dataset using Excel
- Cleaned and standardized messy raw data using Excel and Power Query, resolving inconsistent product names, duplicates, and formatting errors
- Built an interactive Power BI dashboard with DAX measures to track total sales, order volume, and product-wise performance
- Analyzed product-level sales trends to flag top-performing and slow-moving products, supporting the owner's stock decisions

Data Analytics Job Simulation (Forage)

July 2026 (1 mo.)

Deloitte Australia Program

Virtual

- Applied data visualization and modeling techniques to convert raw business scenarios into stakeholder-ready presentations, following Deloitte's client-engagement framework

Data Science Intern

October 2024 (1 mo.)

CodeAlpha

Remote, India

- Built time-series forecasting models on historical stock data, applying trend and seasonality analysis
- Designed and ran A/B tests using hypothesis testing, converting results into concrete recommendations
- Tuned classification models on the Titanic dataset through feature engineering, improving prediction accuracy

Projects

Swiggy End-to-End Data Pipeline – Microsoft Fabric, SQL Server, Power BI

2025

- Engineered a full pipeline for 190K+ food-delivery records – raw CSVs into a Fabric Lakehouse, transformed to Delta tables, loaded into a Fabric Warehouse
- Designed a normalized star schema (1 fact + 4 dimension tables) with PK/FK constraints and null/duplicate validation; built a live Power BI model tracking revenue and order trends

Logistics Fleet & Operations Dashboard – Power BI

2025

- Built a 4-page dashboard tracking hub capacity, driver performance, and vehicle health; flagged underutilized hubs and high-risk vehicles via age-vs-breakdown analysis
- Engineered dynamic DAX measures and a parameter-driven KPI switch to toggle metrics across synced pages

Deep Learning Pipeline for Missing Person Identification – CNN, GAN, Python

2026

- Final-year dissertation: built a deep learning pipeline using CNN and GAN architectures to handle messy, high-dimensional image data at scale for identity matching

Education

B.Sc. Computer Science (Honours), Deen Dayal Upadhyaya College, University of Delhi

2022 – 2026

CGPA: 7.33

Class XII – CBSE, Commerce with Mathematics, R.P. Memorial Sr. Sec. Public School

2021 – 2022

83.6%

Certifications

- Advanced Diploma in Computer Application (ADCA)
- IBM SkillsBuild Data Analytics with AI (AICTE / BharatCares)
